BI Project

The final package

With the BI solution complete and all the preliminary OLAP and Data mining analysis finished, it is time to prepare the final bundle for delivery.

You will have until the 24th of May to complete this assignment and until the 31st of May to submit the final report. Thus, you must **prepare a 5 minutes presentation (pitch) and a poster** to describe and promote your BI solution in a public session during the last class of this semester. Finally, you will deliver a report describing your project in detail, explaining the choices/options you made, and discussing the preliminary results.

Deliverables and deadlines

1. Submit a .pdf file with the poster in size A3 in *Inforestudante* until the **24th of May** and bring a printed exemplar to class on the next day
2. Submit a .pdf file with the presentation in *Inforestudante* until the **24th of May**
3. Deliver a **5 minutes** presentation on the class of the **25th of May**
4. Submit a .pdf file with the final report in *Inforestudante* until the **31st of May**

Objective and guidelines

Please refer to the attached templates for more information on the objectives and contents of the presentation and poster.

In the final report you must:

- Incorporate information from all the past and present presentations of the project. You can structure the document using the same order of the intermediate deadlines.
- Make sure to include more detail than you showed in the oral presentations.

- Make sure to comply with the feedback received during the presentations from the teacher and your colleagues.
- Do not leave significant technical details out of the report.
- Make sure to discuss preliminary findings and state their relevance in terms of decision support.
